CONTENTS IN BRIEF

Editorial

Digestive system diseases need more concern and study .......................................................... 129
DONG Yongsui

Children Digestive System Diseases

Pathological changes and clinical manifestations of 1020 children with liver diseases confirmed by biopsy ................................................................. 131
ZHANG Hongfei, YANG Xiaojin, ZHU Shishu, et al

Esophageal function in children with hiatal hernia before and after surgery .......................... 135
ZHOU Xuelian, JIANG Mizu, OU Biyou, et al

Childhood anus oil spillage in 47 cases .................................................................................. 138
WANG Baoxi, WANG Maogui, GAN Ziwei

Multi-system rotavirus infection in 2 infants .......................................................................... 141
LI Ning, YAO Yingmin

Relationship between Helibacter Pylori strains possessing cagA and vacA and gastroduodenal disease .......... 144
XU Chundi, ZHENG Jie, XI Rongping, et al

Gastric epithelial cell proliferation, apoptosis and Fas gene in children with Helicobacter pylori associated chronic gastritis ............................................... 148
DAI Yang, WANG Baoxi, WANG Maogui

Original Articles

MICM classification and its correlation with therapy and prognosis in childhood acute lymphoblastic leukemia ................................................................. 152
HE Jun, XUE Yongquang, HE Yaxiang, et al

Clinical analysis of subpulmonary ventricular septal defect in 272 cases ................................. 157
LIU Ling, HAN Ling, LU Ping, et al

Changes of learning and memory ability in iron deficiency anemia rats and its relationship with brain trace elements ........................................................................... 161
HU Ruimei, WEI Meiwen, ZHANG Yan, et al

Protective effects of intracerebral transplantation of genetically modified myoblasts producing brain-derived neurotrophic factor on neonatal rats with hypoxia-ischemia brain damage ................................................................. 164
HONG Xirun, SHI Jian, ZHENG Ling, et al

The relationship between the levels of C3 and C4, C-reactive protein and platelet count and the prognosis of systemic inflammatory response syndrome in children .................................................. 169
ZHAO Dongchang, WANG Shuzhen

Peripheral neurophysiological and neuropathological studies in Charcot-Marie-Tooth atrophy disease in children .................................................................................. 173
LU Junlan, WU Husheng, LANG Zhiqi, et al

Reviews

Pathogenesis and clinical manifestations of food allergy in infants and children .................. 179
ZHANG Jingyong, CHEN Yuzhi, WEN Zhaoming

The clinical research of vasovagal syncope in children .......................................................... 182
ZHANG Qingyou, DU Junbáo
CONTENTS IN BRIEF

Special Article

Pay sufficient attention to pediatric infectious diseases, vaccination and rational use of antibiotics in China .......... 193
YANG Yonghong, SHEN Xuzhuang

Original Articles

Clinical characteristics of purulent meningitis complicated with subdural effusion .................................................. 196
ZHENG Hua, SU Ying, DONG Qinghua

Differential diagnostic significance of cytokines in cerebrospinal fluid of children with acute central nervous system infections ..................................................................................................................... 199
JIN Yu, XUE Junli, YU Weiqi, et al

Analysis of clinical data of 620 very low birth weight infants ...................................................................................... 202
SHI Liping, DU Lizhong, SUN Meiyue

A prospective randomized trial comparing intermittent nasoduodenal with intermittent nasogastric feedings in premature infants .................................................................................................................. 206
LU Hui, XUE Xindong, ZHANG Jiaxiang, et al

Diagnosis, treatment and gene detection in 769 cases with hyperphenylalaninemia ......................................................... 210
YE Jun, GU Xuefan, ZHANG Yafen, et al

Pathologic analysis of 170 infants with glomerular diseases ............................................................................................ 214
WANG Jianguo, ZHOU Zhuliang, LI Changchun, et al

Survey of β-Mediterranean anemia (β-TA) prevalence in ethnic minority She of the southwest area in Zhejiang province ................................................................................................................................. 218
LIU Lihua, CHEN Ying, DING Youfa, et al

Use of BMI/Kaup index to assess obesity in pediatrics .................................................................................................. 222
DING Zongyi, DU Lirong

Determination of impulse oscillation (IOS) respiratory parameters in 382 healthy school-age children in Guangzhou area .............................................................................................................................. 225
ZHENG Jinping, LI Minran, AN Jiaying, et al

Role of endogenous carbon monoxide/heme oxygenase (CO/HO) system in the development of hypoxic pulmonary hypertension ............................................................................................................. 230
SHI Yun, DU Junbao, ZENG Chaomei, et al

Reviews

Obesity-related grolleralopathy .............................................................................................................................................. 244
YANG Jiyun

The function of C-C chemokine receptor 3 and related chemokines in bronchial asthma ................................................. 246
LIN Jian, WU Rongxi, LI Changchong

Detection and clinical significance of early response to therapy in childhood acute lymphoblastic leukemia .......... 248
LIU Ying, LÜ Shangen

Members of the Eleventh Editorial Board of Chinese Journal of Pediatrics ................................................................. 256
CONTENTS IN BRIEF

Editorial
Pay special attention to child and adolescent psychological health in China ................................................................. 257
  JING Jin

Mental Problems, Behavior and Psychology
A follow-up study of sensory integrative dysfunction in children .................................................................................. 260
  HUANG Yueqin, LI Xudong, WANG Yufeng
Clinical characteristics of psychogenic diseases in childhood ......................................................................................... 263
  PEI Zhuying, BAO Xinhua, QIN Jiong, et al
Neuropsychological response characteristics of cerebral hemisphere superiority for language in Mongolian children .......................................................... 266
  JING Jin, MO Lei, JIN Yu, et al

Reviews
Genetic progress in antism .................................................................................................................................................. 269
  XU Xiangping, WANG Tianshu
Using play therapy to treat psychological disturbance in children ................................................................................. 271
  GAO Junling
Genes of catecholamine metabolizing enzymes and attention deficit and hyperactivity disorder ......................................................... 273
  GAO Xueping, LI Xuerong

Original Articles
Progressive neurological damages in three patients with sea-blue histiocytosis ................................................................. 277
  DING Changhong, ZOU Liping, WU Husheng, et al
MeCP2 gene mutational hotspots in diagnosis of Rett syndrome ......................................................................................... 280
  MENG Hongdi, PAN Hong, BAO Xinhua, et al
Cytotoxic effects of the exotoxin produced by penner's 19 serotype of Campylobacter jejuni ................................................. 283
  XIE Longshan, CAI Fangcheng
Experimental study of the renal protective effects and mechanism of benazepril in young rats with glomerular sclerosis ................................................................. 288
  HU Bo, LI Hongye, YANG Jiyun, et al
Protein and mRNA expressions of urokinase-type plasminogen activator and type-1 plasminogen activator inhibitor in renal tissues of nephrotic young rats and interfering effects of angiotensin converting enzyme inhibitor ................................................................. 292
  MA Hong, WANG Cuiling
DNA synthesis of airway cells and airway remodelling in sensitized rats ............................................................................... 296
  LUAN Bin, KONG Xiangyong, ZOU Liping, et al
Basal apoptosis rate of adipocytes in Chinese obese and non-obese children ................................................................. 299
  XU Ping, DING Zongyi, DÜ Lirong
The state of infection and resistance of Methicillin-resistant Staphylococcus in pediatrics ......................................................... 303
  LI Xiangyang, YANG Jinhong, LI Fangqu, et al

Lecture
The classification and current advances in epilepsy of children ......................................................................................... 313
  LIN Qing

Members of the Eleventh Editorial Board of Chinese Journal of Pediatrics ......................................................................................... 320
