CONTENTS IN BRIEF

Editorial
Strengthen the clinical and research work of pediatric viral diseases .......................................................... 385
QIAN Yuan

Special Article
Urgent problems to be solved in diagnosis and treatment of viral diseases in children ............................................ 387
DONG Yonggui, FANG Feng

Viral infectious diseases
Clinical manifestations of 3 cases with AIDS in children .................................................................................. 391
WANG Wei, SHEN Kunling

Establishment and application of a modified rapid cell culture technique for the detection of human cytomegalovirus .......................................................... 395
FANG Feng, CHEN Jing, NIE Xingcao, et al

Human caliciviruses of different genotypes identified from infants and young children with acute diarrhea in Beijing area .......................................................... 398
CHEN Dongmei, ZHANG You, QIAN Yuan, et al

Astrovirus infection in young children hospitalized with diarrhea in Beijing Children's Hospital ......................... 402
LIU Chunyan, SHEN Kunling, WANG Shuxin, et al

Genotypes of VP4 and VP7 of rotaviruses identified from infants and young children with diarrhea in Guangzhou city ........................................................................ 405
CHANG Ruxu, PAN Ruifang, ZHU Bing, et al

VP4 and VP7 typing for rotaviruses identified from stool specimens collected from infants and young children with acute diarrhea in Lanzhou .......................................................... 409
ZHANG Chunfang, JIN Yu, ZHANG You, et al

A pilot study on the combined therapy with GM-GSM and hepatitis B vaccine in intrauterine infected chronic Hepatitis B carrier children .......................................................... 413
WANG Jianshe, ZHU Qirong, YU Hui, et al

Lecture
Subacute sclerosing panencephalitis .................................................................................................................. 417
XIE Zhengde, SHEN Kunling

Overview of antiepileptic drugs in children ........................................................................................................ 420
SUN Daokai, WANG Yi

Review
Cytomegalovirus infection and bone marrow failure .......................................................................................... 423
ZHANG Yingchun, LIU Wenjun

Diagnostic techniques of ventilator – associated pneumonia .............................................................................. 426
CAO Yimin, GUO Zaichen

Original article
Tolerance of brain at different maturational stages to prolonged seizure in rats ..................................................... 429
JIANG Li, CAI Fangcheng, ZHANG Xiaoping

Diagnosis and monitoring of childhood neuroblastoma with flow cytometry ............................................................. 434
TANG Yongmin, LI Minju, QIAN Baiqin, et al
CONTENTS IN BRIEF

Special Article

Irrational use of antibiotics in China and the strategy to control ............................................................. 449
TANG Jingbao

Rational use of antibacterial agents ............................................................................................................. 450
ZHANG Yongxin

Animal use of antibiotics and antibiotic resistance of bacteria ............................................................................. 452
SHEN Xuzhuang

Irrational use of antibiotics increases adverse drug reaction ............................................................................. 453
HU Yiji

Hospital-acquired infections caused by antibiotic-resistant bacteria ............................................................. 455
WANG Daiming

Pay attention to studies on the mechanism of antibiotic resistance ............................................................. 457
WANG Fu

Preparation and implementation of guidelines for rational use of antibiotics .................................................. 458
LU Quan, CHEN Huizhong, YANG Yonghong

Discussion about Irrational Use of Antibiotics and Antibiotic Resistance of Bacteria

Surveillance of antimicrobial susceptibility of S. pneumoniae and H. influenzae in children among four hospitals from 2000 to 2001 ............................................................... 461
YANG Yonghong, Lu Quan, DENG Li, et al

Use of antibiotics in Chongqing children's hospital from 1996 to 2001 .......................................................... 467
ZHAO Xiaodong, LU Zhongyi, YANG Xiqiang, et al

Erythromycin resistant genes in group B streptococcus ..................................................................................... 470
YANG Ming, YANG Yonghong, Dmitriev ALEXANDER, et al

Lecture

Beta-lactamase inducing antibiotic resistance for Gram negative bacteria ......................................................... 474
XU Yingchun, CHEN Minjun

Update of fluroquinolone resistance and its mechanism ................................................................................... 476
WANG Hui, CHEN Minjun

Original Articles

A randomized controlled trial on interruption of HBV transmission in uterus ................................................... 478
ZHU Qirong, YU Guangjun, LU Qing, et al

Nonspecific overexpression of type 1 cytokine and low response to specific antigen in hepatitis B immunization failed children .................................................................................. 481
WANG Jianshe, ZHU Qirong

Transfect mFasL-cDNA into mouse bone marrow mononueleate cells by liposomes: an efficient way to induce the apoptosis of allogenic reactive lymphocytes .................................................. 485
XU Zhiliang, TANG Suoqin, ZHANG Xiaofei, et al

Activation of NKT cells with lipid extracts from neuroblastoma cell lysates .................................................. 489
LIU Lizhen, ZOU Ping, LIU Lingbo, et al

Genetic study on 15 children with β-thalassemia major and their parents in Guiyang ........................................ 493
SHAN Keren, ZHANG Hui, HE Yan, et al

Assessment of cloning in hemophagocytic syndrome .................................................................................... 496
XIAO Yan, LIN Wen, FEI Hongbao

Members of the Eleventh Editorial Board of Chinese Journal of Pediatrics ....................................................... 512
