CONTENTS IN BRIEF

Editorial
Recent status of prevention and treatment of asthma in children in China ................................................................. 81
CHEN Yu-zhi

Research on Asthma
Expression of CD 86 on monocyte and B cell surface, the level of $\text{T}_\text{H}$-derived cytokine and their correlation in children with asthma ................................................................. 83
ZHU Xiao-ping, YANG Xi-qiang, FU-Zhou, et al

Relationship between bronchial hyperresponsiveness and the peripheral obstruction in stable asthmatic children ................................................................. 87
YIN Ju, SHEN Kun-ling, LIU Shi-ying, et al

Effect of macrophage inflammatory protein-1$\alpha$ and its mRNA on airway inflammation of mouse asthma model ................................................................. 90
LI Chang-chong, ZHANG Wei-xi, CHEN Xiao-fang, et al

Effect of melatonin on the expression of nuclear factor-kappa B and airway inflammation in asthmatic rats ............... 94
WANG Ya-ting, CHEN Sheng-li, XU Shu-yun

Conference Summary
Summary of the 2003 National Symposium on Asthma in Children ........................................................................... 98
The Editorial Board, Chinese Journal of Pediatrics, Chinese Medical Association

Standard/Protocol/Guidelines
The routine for prevention and treatment of bronchial asthma in children (for trial) ......................................................... 100
The Subspecialty Group of Respiratory Diseases, The Pediatric Society, Chinese Medical Association and The Editorial Board, Chinese Journal of Pediatrics, Chinese Medical Association

Diagnosis and treatment of critical status of asthma in children ..................................................................................... 106
The Subspecialty Group of Respiratory Diseases, The Pediatric Society, Chinese Medical Association and The Editorial Board, Chinese Journal of Pediatrics, Chinese Medical Association

Rapid Pathway
A novel mutation of $NPHS2$ identified in a Chinese family with steroid-resistant nephrotic syndrome ................. 108
YU Zi-hua, DING Jie, GUAN Na, et al

Original Article
Survey of type 1 diabetes incidence in children from 1997 to 2000 in Beijing area ....................................................... 113
GONG Chun-xiu, ZHU Cheng, YAN Chun, et al

Prediction of food allergy by using cord blood IgE levels .......................................................................................... 117
LI Fei, LI Hai-qi, WANG Run-hua

Correlation between plasma leptin level and premature infant weight loss ............................................................. 121
Magnetic resonance imaging findings in children with cerebral palsy ................................................................. 125
HOU Mei, FAN Xi-wen, LI Yu-tang, et al

Protective effects of fructose-1, 6-diphosphate on brain damage caused by febrile seizures in rats ....................... 129
ZHOU Jian-ping, WANG Fan, LI Rui-lin, et al

Effects of U74389G on pulmonary macrophage influx and lung development in 95% O₂ exposed newborn rats ......................................................................................... 134
LUO Xiao-ping, LIAO Ling-jie, LI Yu-xiang, et al

Brief Report

Study on the association of platelet-activating factor acetylhydrolase with asthmatic children ............................. 139
LU Ji-rong, WANG Zhen-hua, ZHAO Kai-shu, et al

Exploration of the levels and significance of serum s C5b-9, s VCAM-1, s ICZM-1 in children with asthma ............. 140
LIU Xiao-ping, FENG Jin-huan, LUAN Gui-zhen, et al

NF-κB/IκB signal pathway regulated Ang II-induced chemokines synthesis by human mesangial cells .......... 141
HUANG Song-ming, ZHANG Ai-hua, DING Gui-xia, et al

Clinical Experience

Clinical study on doxofylline injection in treatment of children with acute asthma attacks ............................. 143
ZHANG Jia-xiang, LIN Hui-quan, CHEN Jin-shan, et al

Assessment of inhalation technique and its influencing factors in asthma children .............................................. 143
ZHONG Han-rong, SU jian, YU Xiao-juan, et al

A comparative study on clinical and MRI characteristics of Mycoplasma pneumoniae encephalitis in children .... 145
WANG Hua, ZHAO Ji-shun, YU Yi-Bing, et al

Quantitative analysis of SMN-T and SMN-C copies in childhood type spinal muscular atrophy ...................... 147
YANG Xiao-su, DING Hua-xin, XIAO Bo, et al

Review

Formation and modifying factors of atopy in early life ......................................................................................... 150
LI Xiao-qing, HONG Jian-guo

Advances in pharmacotherapy of respiratory syncytial virus and rhinovirus infections .................................... 152
ZHAO Yu-hong, SHEN Kun-ling

Drug-resistant and multiple drug-resistant tuberculosis in children ................................................................. 154
WU Sheng-hua, LU Chao

Clinical Case Discussions

No. 114: recurrent left knee joint swelling and intermittent fever ................................................................. 158
Pediatric Hospital Affiliated to Fudan University

Members of the Twelfth Editorial Board of Chinese Journal of Pediatrics .......................................................... 160
