Hong Kong to host WHO Regional Committee Meeting

Hong Kong will host the 60th session of the Regional Committee for the Western Pacific of the World Health Organization (WHO) in September 2009.

The resolution was passed by the committee during the 59th session which was held in September 2008 in Manila.

The Director of Health, Dr PY Lam, who attended the WHO Western Pacific Regional Committee 59th session in Manila, welcomed the resolution and said Hong Kong was most privileged to be the host city for the upcoming event.

Noting that it had hosted a successful WHO Regional Committee Meeting for the Western Pacific in 1992, Dr Lam said Hong Kong had all the essential elements to host the event.

"With the endorsement by the regional committee, we shall be able to press full steam ahead with our preparatory work," Dr Lam said.

The WHO Western Pacific Regional Committee consists of representatives from the region's 37 countries and areas who meet annually in September to discuss public health issues and formulate strategies with a view to improving the health of the people in the region.

Hong Kong has been participating in the WHO's Regional Committee Meeting on its own in the name of Hong Kong, China, since 1997.

The Hong Kong Society Of Community Medicine
